

RESEARCH PERFORMANCE REPORT – 2023

Master Chart of Metrics

PUBLICATIONS

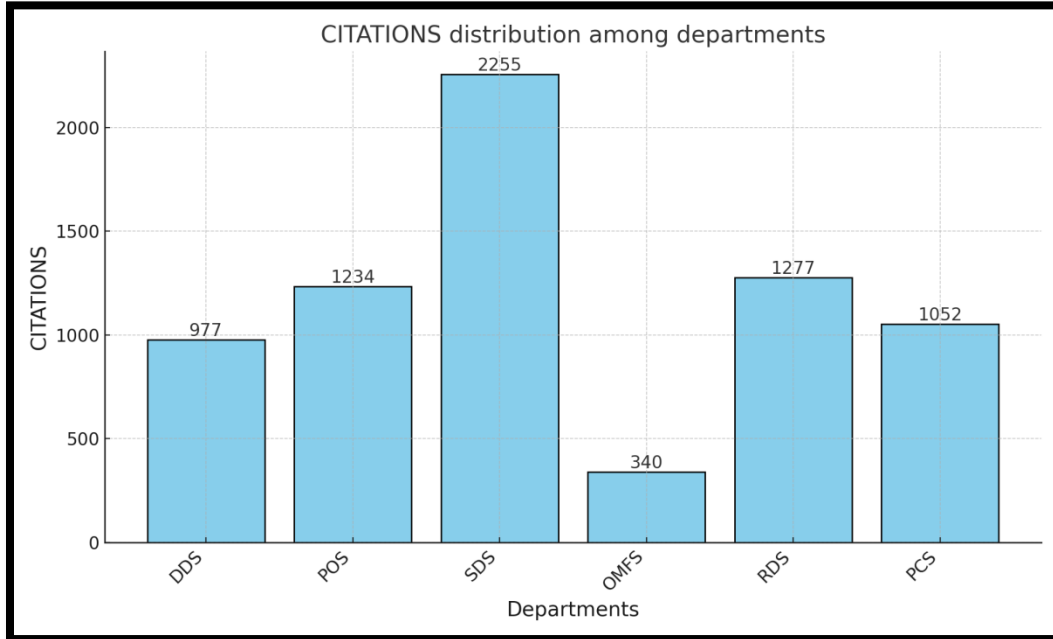

The highest value for publications is 180, achieved by the SDS department. The average value across departments is 76.50, with the lowest being 26, recorded by the OMFS department.

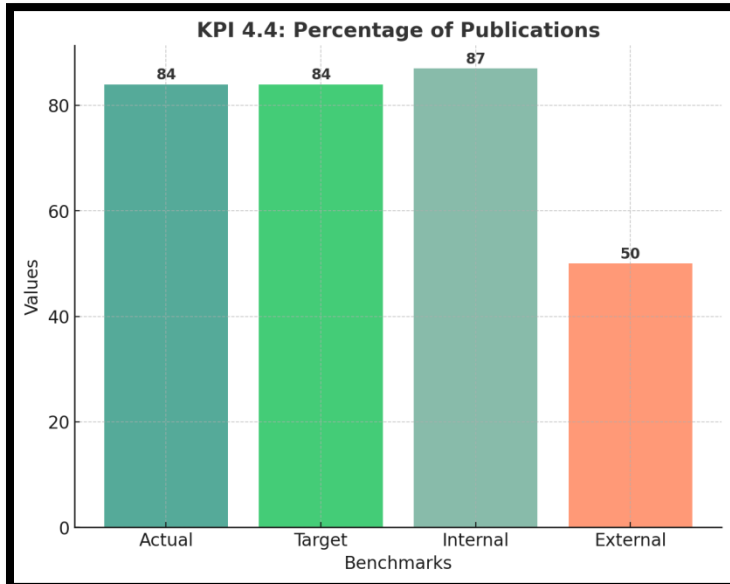

CITATIONS

The highest value for citations is 2255, achieved by the SDS department. The average value across departments is 1189.17, with the lowest being 340, recorded by the OMFS department.

KPI 4.4: Percentage of Publications of Faculty Members

This KPI is analyzed by calculating the percentage of faculty publications in indexed journals. The table below and accompanying graph highlight the actual, target, internal, and external benchmarks.

Strengths

1. Participation of all faculty in scientific research.
2. High number of publications in indexed journals.

Areas for Improvement

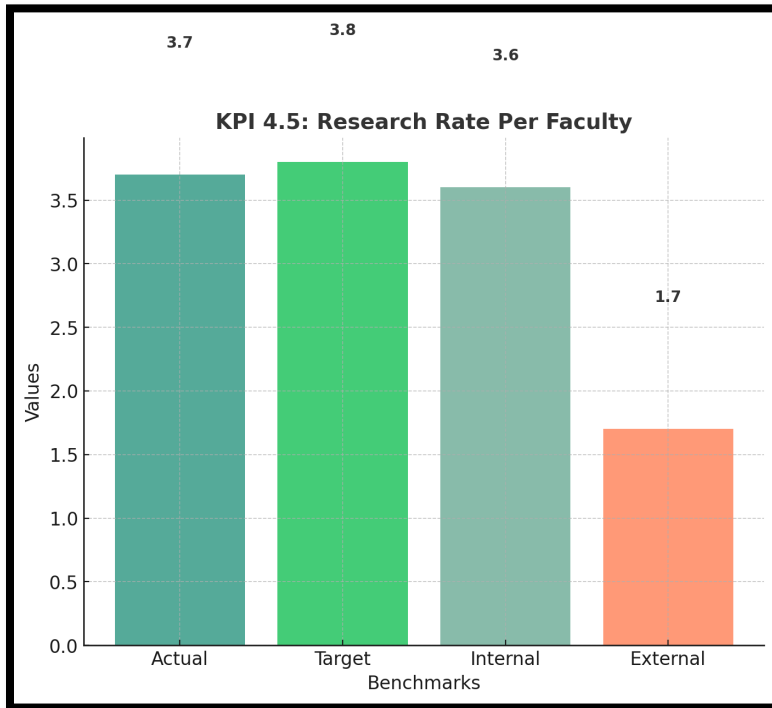

1. Increase the number of publications in Web of Science (ISI) indexed journals.

Action Plan

| What | Who | When | How |
|--|------------------------------|----------------|---|
| Incentives and funding for faculty publications | Department and College Board | Every Semester | Recommend further incentives and funding for publications in Web of Science (ISI) journals. |

KPI 4.5: Rate of Published Research per Faculty Member

This KPI is analyzed by dividing the total number of publications of the college by the total number of faculty. The following graph provides insights into benchmarks.

Strengths

1. Achieved internal and external benchmarks.
2. Every faculty member has publications in indexed journals.

Areas for Improvement

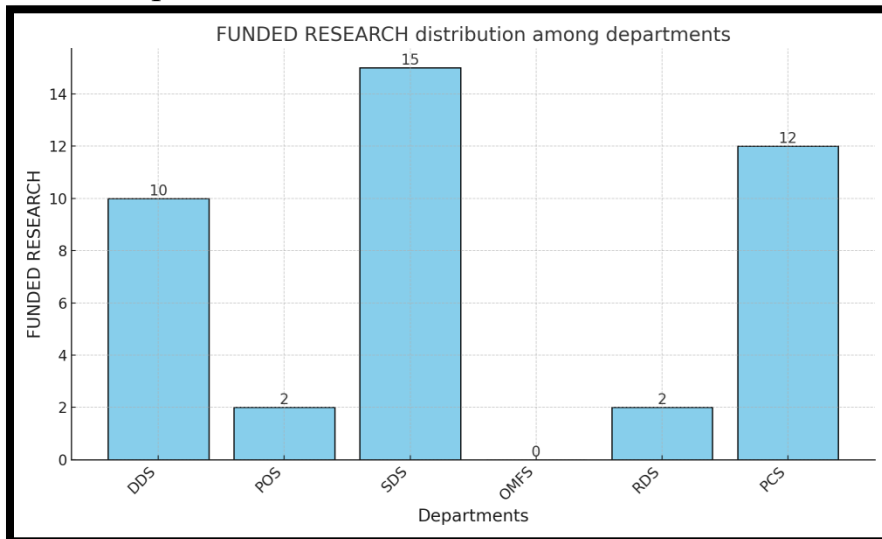

1. Further increase the rate of publications per faculty member.

Action Plan

| What | Who | When | How |
|--|------------------------------|----------------|---|
| Incentives and funding for faculty publications | Department and College Board | Every Semester | Recommend further incentives and funding for publications in Web of Science (ISI) journals. |

FUNDED RESEARCH

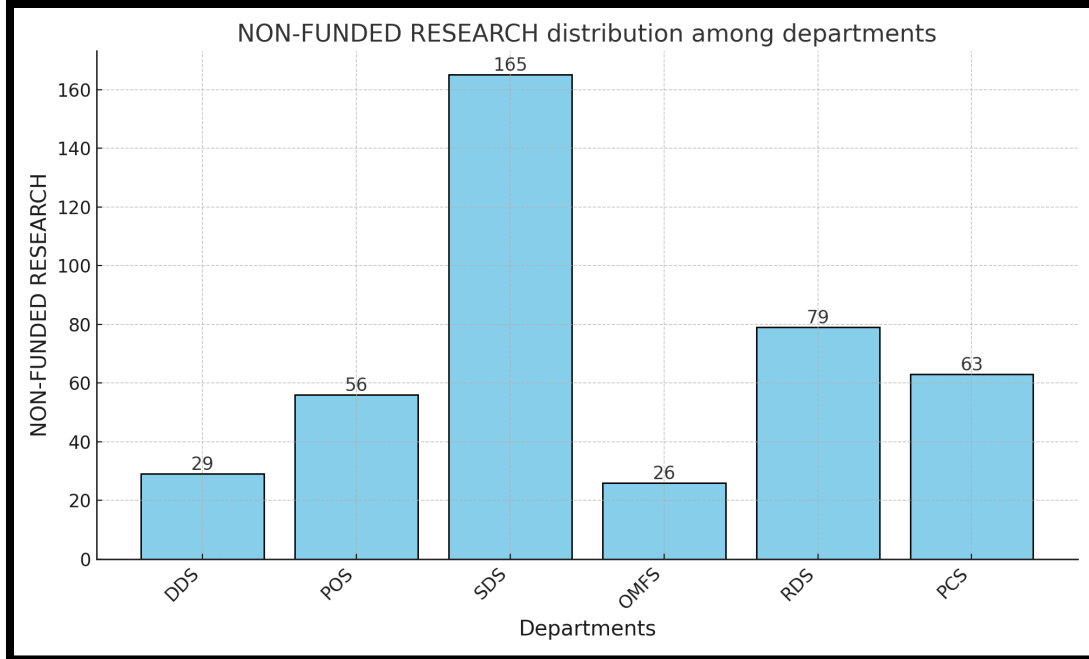

The highest value for funded research is 15, achieved by the SDS department. The average value across departments is 6.83, with the lowest being 0, recorded by the OMFS department.

NON-FUNDED RESEARCH

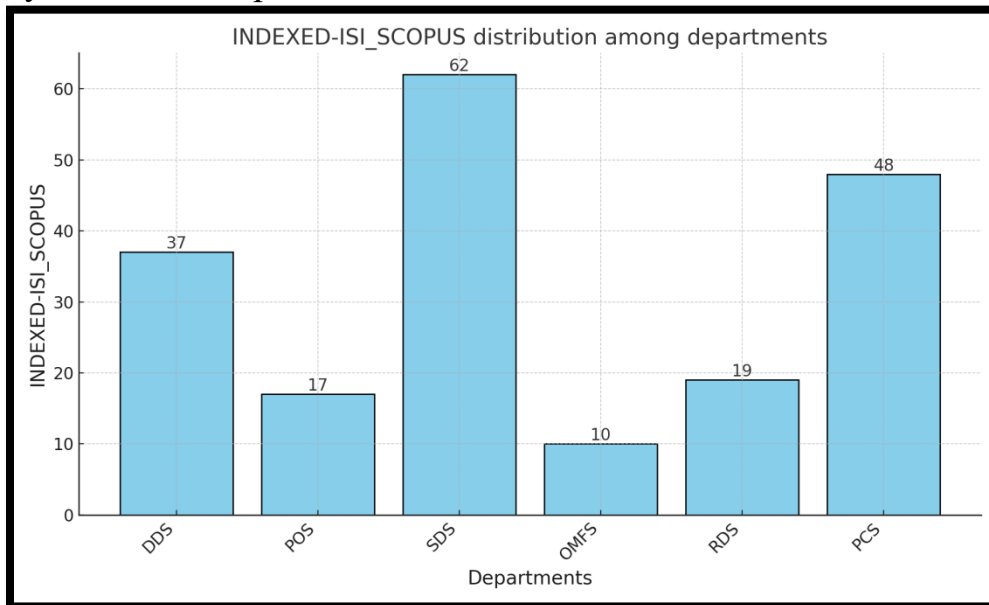

The highest value for non-funded research is 165, achieved by the SDS department. The average value across departments is 69.67, with the lowest being 26, recorded by the OMFS department.

INDEXED-ISI SCOPUS

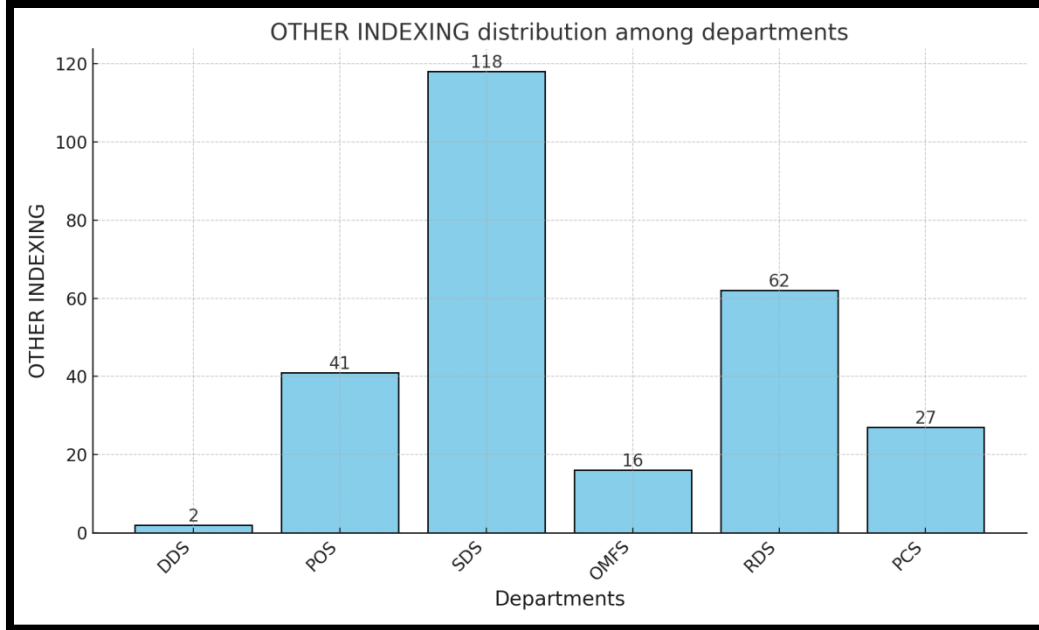

The highest value for indexed-ISI_Scopus is 62, achieved by the SDS department. The average value across departments is 32.17, with the lowest being 10, recorded by the OMFS department.

OTHER INDEXING

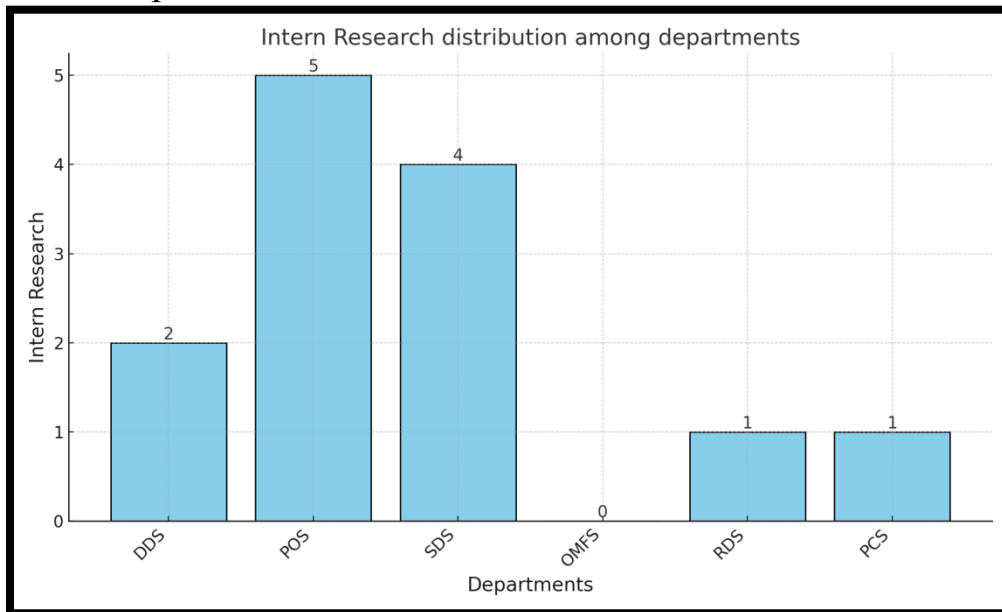

The highest value for other indexing is 118, achieved by the SDS department. The average value across departments is 44.33, with the lowest being 2, recorded by the DDS department.

Intern Research

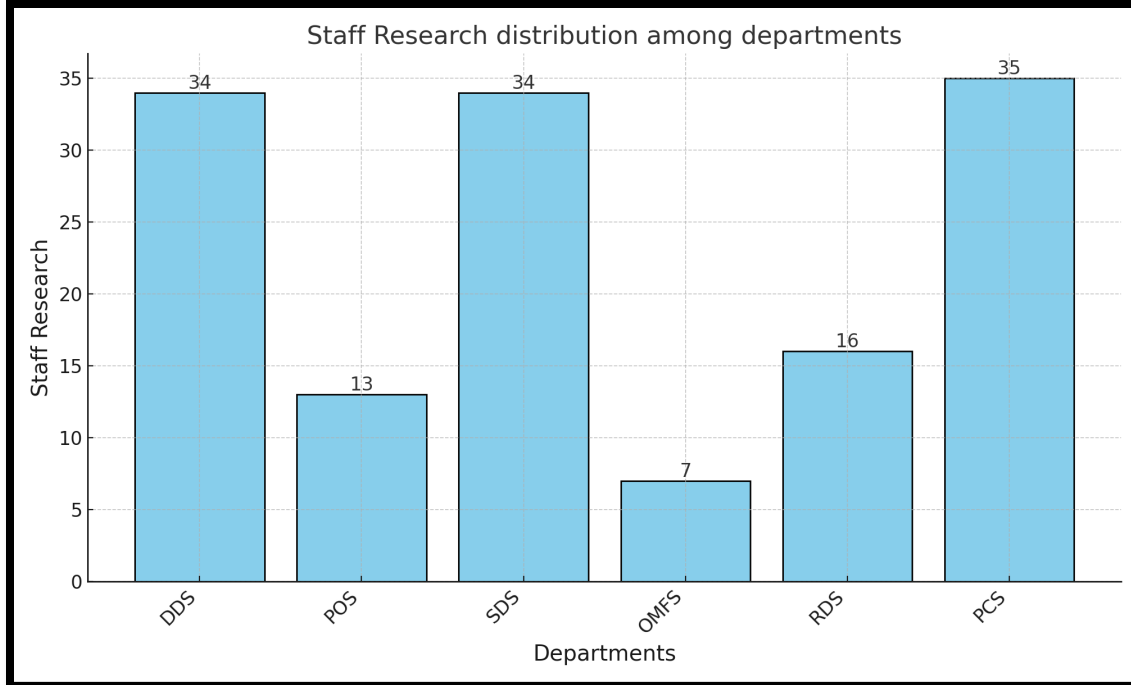

The highest value for intern research is 5, achieved by the POS department. The average value across departments is 2.17, with the lowest being 0, recorded by the OMFS department.

Staff Research

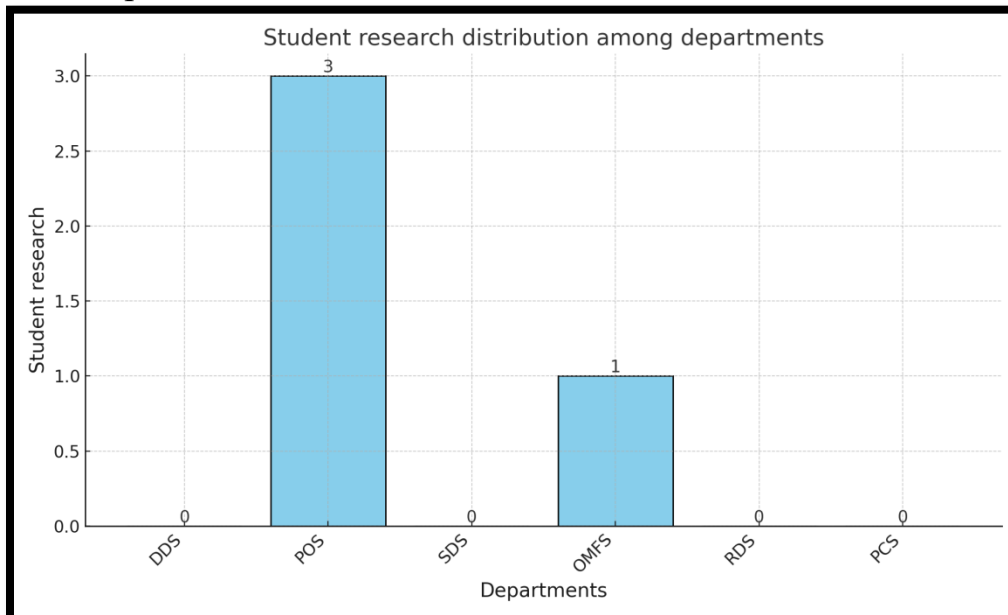

The highest value for staff research is 35, achieved by the PCS department. The average value across departments is 23.17, with the lowest being 7, recorded by the OMFS department.

Student research

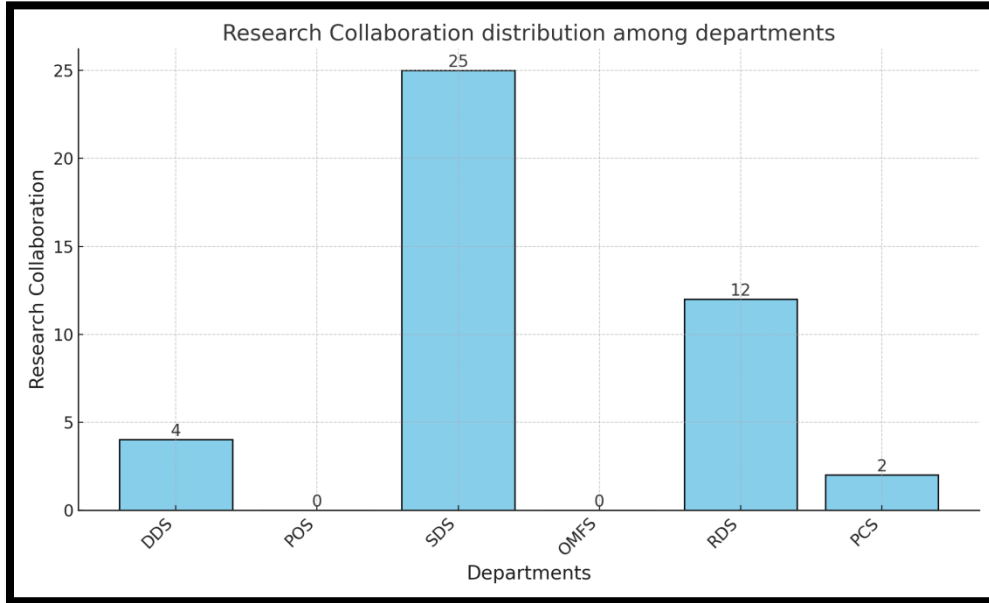

The highest value for student research is 3, achieved by the POS department. The average value across departments is 0.67, with the lowest being 0, recorded by the DDS department.

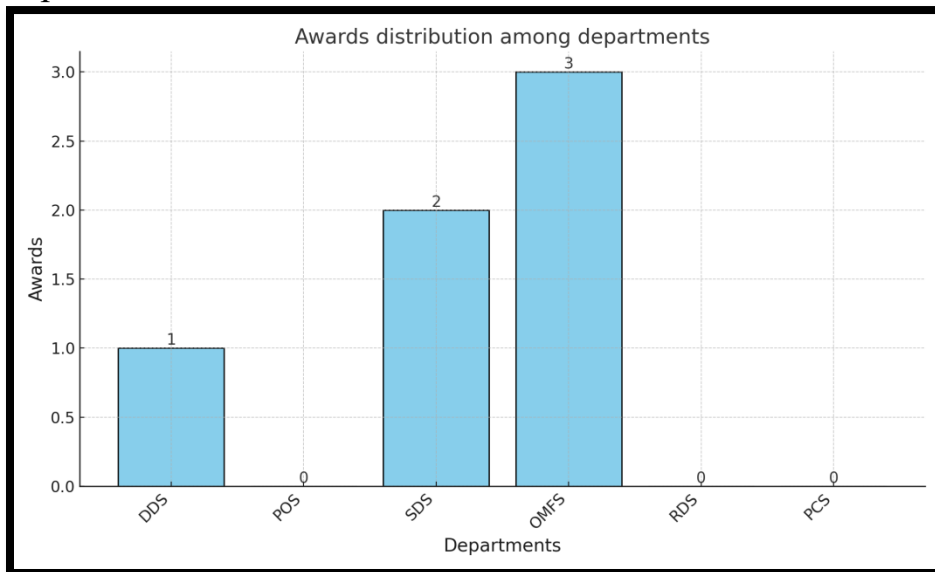

Research Collaboration

The highest value for research collaboration is 25, achieved by the SDS department. The average value across departments is 7.17, with the lowest being 0, recorded by the POS department.

Awards

The highest value for awards is 3, achieved by the OMFS department. The average value across departments is 1.00, with the lowest being 0, recorded by the POS department.

Patents

The highest value for patents is 1, achieved by the SDS department. The average value across departments is 0.17, with the lowest being 0, recorded by the DDS department.
